FOREWARD

Statistics on Social Work Education in the United States is published annually by the Council on Social Work Education. Data are provided by CSWE accredited baccalaureate and master's degree social work education programs. Data on the number of students receiving degrees cover the academic year 1988-89. All other data are reported as of November 15, 1989.

Special appreciation is extended to Dr. Elaine Spaulding, who compiled and analyzed the data and wrote this report. I also would like to express my appreciation to the program deans, directors, faculty and staff for their cooperation in completing the survey instruments.

INTRODUCTION

This report contains information on U.S. social work education programs, faculty, and students. The data contained in the report were supplied by 96 (98.9 percent) of the 97 CSWE-accredited graduate social work education programs in the United States. Three hundred seven (84.8 percent) of the 362 CSWE-accredited baccalaureate programs in the United States also provided data. Doctoral information was provided by 43 (91.5 percent) of the 47 social work doctoral programs. At the time of the survey there were 39 master's programs, 58 master's programs jointly administered with baccalaureate programs ("joint programs"), and 304 baccalaureate programs. Thirty two programs were in candidacy (preaccredited status), ten at the master's level and 22 at the baccalaureate level. Faculty data from one graduate school in candidacy were reported together with baccalaureate faculty information and were included in all faculty tables. However, the tables on student data include only those programs already accredited. Information on students from candidate schools is reported in separate tables. Programs accredited at the time of the survey are listed in Appendix A.

The tables presented in the report consist of tabulated responses to four surveys: (1) Schedule I - Social Work Education Programs and Faculty; (2) Schedule II - Statistics on Baccalaureate Social Work Education Programs; (3) Schedule III - Statistics on Master's Social Work Programs; (4) Schedule IV - Statistics on Doctoral Social Work Programs; and (5) Candidate Schedules. Due to varying item-specific response rates, totals across tables may not be equal. Total response rates are indicated in the text tables, and individual program response information is indicated in the reference tables.

The rate of response from undergraduate programs remained about the same as in the past several years. This year the overall response rate of graduate programs remained the same. Until 1983, however, graduate program information represented the total population, and only one or two programs omitted item-specific information. Since then, a growing percentage of programs increasingly omitted data on several items. More prominent of these items are faculty salaries and publications. Because of this phenomenon, increased attention should be paid to the total response rates indicated on the faculty salary tables. The definition of full-time faculty as spending more than 49 percent of his or her time in social work-related activity was maintained to ensure the comparability of these findings with earlier editions of Statistics on Social Work Education. Additionally, because of fluctuating item-specific response rates, caution should be taken in interpreting the results of tables containing small cell data.

SOCIAL WORK EDUCATION PROGRAMS

Geographic Distribution

Table 1 displays the geographic distribution of the 337 programs that responded to this portion of the canvass. While there are a greater number of baccalaureate programs than both levels of graduate programs in the United States, joint programs have a higher concentration of faculty. The Midwest (Region 5) has the greatest number of programs at the graduate and baccalaureate levels. Region 5 also has the largest number of faculty employed in baccalaureate and joint programs. Region 1 has the largest faculty employed in graduate only programs, but Region 5 has the greatest number of faculty. In contrast, the Northwest (Region 10), and the Rocky Mountain States (Region 8) have relatively few programs or faculty. All of these figures should be considered in light of the population sizes in the various regions and response rates of the programs.

Institutional Characteristics

Most programs are in state colleges or universities. As shown in Table 2, 215 (59.1 percent) of all respondent programs and 64 (68.4 percent) of graduate or joint programs are located in state colleges or universities. At the baccalaureate level, however, the programs are evenly distributed between state and private programs with 138 (51.9 percent) housed in public institutions. Baccalaureate programs with private auspices continue to be predominantly church-related institutions (79.7 percent). In contrast, 20 (20.4 percent) private graduate and joint programs are under other institutional arrangements. All but five respondent programs in public institutions are in state colleges or universities, of which two graduate/joint level programs designated other public institutional arrangements. The distribution of respondent programs and faculty by institutional auspices varies little from year to year.

TABLE 1

Number of Educational Programs and Faculty, by Geographic Region and Level of Program[1]

	Level of Program							
	Graduate Only		Joint		Baccalaureate		Total	
*Region	Programs	Faculty	Programs	Faculty	Programs	Faculty	Programs	Faculty
1	5	277	2	44	16	109	23	430
2	6	215	6	394	23	135	35	744
3	3	86	8	291	37	146	48	523
4	7	122	9	222	38	164	54	508
5	4	168	15	452	49	242	68	862
6	5	119	5	127	26	110	36	356
7	1	45	5	142	26	108	32	295
8	2	61	2	31	11	56	15	148
9	3	104	8	266	7	52	18	422
10	1	37	1	19	6	75	8	131
Total	37	1,234	61	1,988	239	1,197	337	4,419

* The regional classification is based on the Federal regions of the U.S. Department of Health and Human Services. Each region consists of the following:

Region 1 - Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont
Region 2 - New Jersey, New York, Puerto Rico, and the Virgin Islands
Region 3 - Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
Region 4 - Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
Region 5 - Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
Region 6 - Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
Region 7 - Iowa, Kansas, Missouri, and Nebraska
Region 8 - Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
Region 9 - Arizona, California, Hawaii, and Nevada
Region 10 - Alaska, Idaho, Oregon, and Washington

Social work programs are located primarily in non-ethnic, coeducational colleges or universities (87.4 percent). This majority includes 86.5 percent of graduate, 93.4 percent of joint, and 86.1 percent of baccalaureate programs. Twelve percent of social work programs are organized around ethnic identification or gender. Only three graduate (8.1 percent) and 13 (4.9 percent) baccalaureate programs are in nonethnic women's colleges. Additionally, one graduate (2.7 percent), three joint (4.9 percent) and 19 baccalaureate (7.1 percent) programs are in Black, coeducational institutions. Two master's and five baccalaureate programs indicated they are located in Black, men's institutions.

Graduate and joint programs are more frequently found in institutions with relatively large student enrollments, while baccalaureate programs are more likely to be located in institutions with small student enrollments. As shown in Table 3, jointly administered programs are more likely to be located in larger institutions than are graduate programs not jointly administered with baccalaureate programs. Almost 60 percent (59.0 percent) of joint programs are in institutions with at least 20,000 students enrolled as compared to 41.7 percent of graduate programs and 5.6 percent of baccalaureate programs. In contrast, the majority (76 percent) of baccalaureate programs are in institutions with less than 10,000 enrolled students; 53.7 percent are in institutions with less than 5,000 enrolled students.

1 The numbers in this table represent only those programs that responded to this part of the survey. The number of graduate social work education programs accredited by CSWE is 97. CSWE-accredited baccalaureate social work education programs number 362.

TABLE 2

Number of Educational Programs and Faculty, by Institutional Auspices and Level of Program [1]

20,000 and over	15	36	15	66
Total	36	61	266	363

Number of Faculty

Graduate and joint programs have larger faculties than do baccalaureate programs, as displayed in Table 4. Ninety-six (95.5) percent of baccalaureate programs have fewer than ten faculty members. In comparison, one graduate school and two joint programs have fewer than 10 faculty members, while 56.8 percent of graduate and 47.5 percent of joint programs have 30 or more faculty members. The mean number of faculty members for graduate/joint programs is 34.3. The mean number of faculty members in baccalaureate programs is 4.9.

1 The numbers in this table represent only those programs that responded to this part of the survey. The number of graduate social work education programs accredited by CSWE is 97. CSWE-accredited baccalaureate social work education programs number 362.

TABLE 4

Number of Social Work Education Programs, by Number of Faculty and Level of Program

Number of Faculty	Level of Program

60 and Over	5	5	0	10
Total	37	61	266	364

SOCIAL WORK FACULTY

Time in Social Work Education

About two-thirds of all faculty members are appointed full-time to the institutions and spend 100 percent of their time in the social work program. As displayed in Table 5, 61.6 percent of the faculty members in joint programs are appointed full-time and dedicate 100 percent of their time to the social work program. In graduate programs, 58.9 percent are full-time faculty working 100 percent of their time in social work programs, as are 66.1 percent of baccalaureate faculty members. A small additional percentage of faculty at each program level are appointed full-time and spend at least one-half, but not all, of their time in the social work program. Less than 2 percent of the faculty members in all programs spend less than one-half of their time in social work while holding full-time appointments. For 2.4 percent of the full-time faculty members in baccalaureate programs, less than 50 percent of their time is dedicated to social work

TABLE 5

Faculty, by Percent of Time in Social Work Education and Type of College/University Appointment

Percent of Time to Social Work	Type of College/ University App't	Level Of Program							
		Graduate Only		Joint		Baccalaureate		Total	
		#	%	#	%	#	%	#	%

Total		1,234	100.0	1,950	100.0	1,197	100.0	4,381	100.0

programs. A greater percentage of the faculty members in graduate schools are employed part-time than are those in joint and baccalaureate programs; 21.2, 22.3, and 7.5 percent, respectively. The percentage of part-time faculty decreased this year by almost 2 percent, while the percentage of unknown time allocation increased from 3.8 percent to 16.4 percent.

The distribution of time allocated to baccalaureate and graduate social work education for faculty members in joint programs is displayed in Table 6. This year's responses indicated an increase in the distribution of time spent exclusively in graduate activities. Decreases were reported in all other categories. These decreases are in contrast to the increases reported since Academic Year 1986. Caution must be used in interpreting these findings, however, because they may be driven by varying response rates during this three-year period.

TABLE 6

Faculty in Jointly Administered Programs,
by Time Assigned to Graduate and Baccalaureate Social Work Education (1988, 1989)

Time Assigned to Graduate and Baccalaureate Social Work Education	1988		1989		% Change
	#	%	#	%	
All to Graduate	544	65.9	1,016	52.9	- 13.0
Most to Graduate	321	13.1	343	17.8	4.7
Equal to Both	131	8.9	237	12.5	5.6
Most to Baccalaureate	102	3.9	107	5.9	2.0
All to Baccalaureate	92	8.0	208	10.9	2.9
Total	1,190	100.0	1,911	100.0	

Table 7 shows the percentage of time assigned to the doctoral level among full-time faculty in those graduate programs that reported assignment of faculty members to doctoral education in social work. Among these programs, 60.7 percent of the full-time faculty members have no teaching assignment at the doctoral level. Twenty (20.2) percent of the faculty members spend less than one-fourth of their time in doctoral activities, while only 7.6 percent spend more than one-half of their time in these activities.

TABLE 7

Full-time Faculty in Programs Offering Doctoral Social Work Education,
by Percentage of Time Assigned to Doctoral Level*

Percent of Time Assigned to Doctoral Level	#	%
None	707	60.7
1 - 24	235	20.2
25 - 49	133	11.4
50 and Over	89	7.6
Unknown	0	0.0
Total	1,164	100.0

*See Reference Table 300 for the number of full-time faculty listed by school.

Sex, Age, Ethnicity, and Earned Degrees

Table 8 displays the distribution of male and female faculty members by age groups. For this analysis, responses of graduate and joint members were aggregated. The modal age group for men at the graduate/joint level in this year was 45-54, while the modal age group for graduate/joint female faculty members remained the same as it has been for the past seven years (35-44). The average individual age, however, of women who are faculty at graduate/joint programs was higher than the aggregated modal age group, 47.7 years. The modal age group for all baccalaureate faculty remained at 35-44 years of age. On average, baccalaureate faculty members are younger than their graduate/joint counterparts. Baccalaureate male faculty members have an average age of 47, while their female counterparts have the lowest average age, 44 years. Baccalaureate faculty members are more likely to be younger than are graduate/joint faculty. Women are more likely than men are to be in the youngest category (under 35 years of age). If this age distribution remains somewhat constant in future years, an increasing number of women are likely to be employed in social work faculty positions.

TABLE 8

Faculty, by Age, Gender, and Level of Program*

Level	Age	Gender					
		Male		Female		Total	
		#	%	#	%	#	%
Graduate and Joint	Under 35	38	2.8	82	5.1	120	4.0
	35 - 44	404	29.3	597	36.9	1,001	33.4
	45 - 54	483	35.0	567	35.0	1,050	35.0
	55 and Older	454	32.9	372	23.0	826	27.6

	35 - 44	187	37.1	309	47.7	496	43.1
	45 - 54	206	40.9	199	30.7	405	35.1
	55 and Older	88	17.5	80	12.3	168	14.6
	Total	504	100.0	648	100.0	1,152	100.0

*Does not include information for 230 faculty members with missing data for gender and/or age.

The distribution of male and female faculty members among ethnic categories is displayed in Table 9. The proportion of men and women of minority ethnicity has remained relatively stable in recent years. Most faculty members of minority ethnicity at both the graduate/joint and baccalaureate levels are Black. Also, at both program levels, a greater percentage of women than men are of minority ethnicity. This pattern endures over time and is most pronounced among Black and Puerto Rican faculty members, particularly in baccalaureate programs. An equally stable reverse pattern is found for Chicano faculty members at both levels and for Asian-Americans in graduate/joint programs.

TABLE 9

Faculty by Ethnicity, Gender, and Level of Program*

*Does not include information for 27 faculty members with missing data for gender or ethnicity.

The educational attainment of male and female faculty members is displayed in Table 10. A greater proportion of faculty members in graduate/joint programs have earned a degree higher than a master's, while most baccalaureate program faculty have not. All but a small fraction of faculty members with no higher than a master's degree have their master's in social work. In graduate/joint programs, faculty members with doctorates in social work greatly outnumber individuals with doctorates in other disciplines. In baccalaureate programs, however, this disparity is less pronounced. The number of faculty members trained at the doctorate level has remained relatively constant since Academic Year 1986 for both graduate/joint and baccalaureate programs.

It should be noted that the number of men holding doctorates at the graduate/joint level is greater than the number of women holding advanced degrees. At the graduate/joint level, 43.8 percent of men hold doctorates in social work as compared to 35.9 percent of women. At the baccalaureate level, 24.4 percent of men and 18.6 percent of women hold doctorates in social work. This pattern is more pronounced at the graduate/joint level for faculty members with doctorates in disciplines other than social work.

*Does not include information for 66 graduate/joint faculty members with missing data for gender or degree.

The distribution of highest earned degrees among faculty members is displayed by ethnic categories in Table 11. Asian-Americans have the highest percentage of doctorates at both the graduate/joint as well as the baccalaureate levels. Native American and Puerto Rican faculty have the second highest percentage of doctorates in graduate/joint programs, while Blacks have the second highest percentage in baccalaureate programs. Except for Blacks and Whites, percentages reported in all categories of ethnicity are based on small numbers and should be interpreted cautiously.

* Does not include 66 faculty members with missing data for ethnicity and degree.
** Number not included in total or as part of the percentage base

The proportion of faculty members who hold master's degrees in social work is shown in Table 12 by each category of highest earned degree. In graduate/joint programs, 95.4 percent of faculty members have master's degrees in social work, while in baccalaureate programs, 95 percent hold this degree. Ninety-eight percent of individuals with doctorates in social work and 67 percent of those with doctorates in other disciplines also have a master's degree in social work. In graduate/joint programs, 83.1 percent of faculty members have either a doctorate or a master's in social work, while 83 percent of their baccalaureate counterparts have a graduate degree in social work.

*Does not include information for 283 faculty members with missing data.

Rank

Table 13 displays the distribution of faculty members by rank and gender at each program level. At the graduate/joint program level there are more faculty who are associate professors, but the percentages of professors and assistant professors are only slightly less. At the baccalaureate level, more faculty are assistant professors, and the second largest faculty rank is associate professor. Only 14 percent of baccalaureate faculty are professors. Graduate/joint faculty members are more likely to hold higher ranks than are baccalaureate faculty. This pattern also persists for male and female faculty members: 71 percent of graduate professors are male and 69.1 percent of baccalaureate professors are male.

Table 14 displays the distribution of faculty members by rank, highest degree earned, and program level. Full professors at each level are more likely to have doctorates than master's degrees. At the graduate/joint level, doctorates are held by the majority of faculty in the top three ranks and by a small minority at other ranks. The overall 2:1 ratio of faculty with doctorates in social work versus other doctorates has remained constant over the past five years. The distribution of the doctorates within and without social work has also remained unchanged within ranks.

Table 15 displays the distribution of rank by ethnicity. Asian-Americans, the group with the highest proportion of doctorates, also have the highest proportion of professors. Comparisons among categories in Table 15 or calculation of trends over time should be made cautiously because of the small number of faculty members in some categories of ethnicity and fluctuating response rates over time.

*Does not include information for 44 faculty with unreported data.

Primary Responsibility

Data on the primary responsibility of faculty members were derived in the following manner. First, respondents reported the percentage of full-time appointment assigned to classroom teaching, field instruction, field liaison, administration, and other activities. Primary responsibility was then defined as whichever activity received the highest percentage. Individuals with equal responsibilities for classroom and field responsibilities fall into the "class and field" category. This method applies to all faculty members except those with formal administrative titles, such as dean or director. The primary responsibility for those faculty members with such titles was defined as their formal administrative title.

As shown in Table 16, over three-quarters (77.9 percent) of faculty members in graduate/joint programs and 74.3 percent of those in baccalaureate programs have teaching as their primary responsibility and most of them teach in the classroom. While some faculty members involved primarily in classroom teaching also have field responsibilities, very few have a primary responsibility that involves field teaching or liaison. Women were more likely than men to have primary teaching or administrative responsibilities involving field instruction. Men were also more likely to be employed as deans or program directors, particularly in graduate/joint programs where they held 59 percent of the positions.

*Does not include information for 171 faculty members with unreported data.

Table 17 also reports data on faculty responsibility. It displays the mean percentage assigned to each responsibility among full-time faculty members, not just those assigned to the primary responsibility. All categories of primary responsibility have relatively large mean percentages of time assigned to classroom teaching. In contrast, faculty members with nonadministrative primary responsibilities are assigned, on average, relatively little time to administration. The most common secondary assignment for the greatest proportion of faculty members is field liaison.

TABLE 17

Years on Full-time Faculty

Table 18 shows the number of years on full-time employment of faculty members (who are assigned at least 50 percent of their time to social work). A greater proportion of women than men have been recently hired. For example, the number hired for this year in graduate/joint programs included 51 men and 85 women and in baccalaureate programs included 23 men and 52 women. The disproportionate number of women appointed for this year is most pronounced at the lower levels of rank. The patterns of more women than men being recently hired and disproportionately so at lower levels of rank are patterns that have been noted in the CSWE annual surveys since the latter half of the 1970s. More males than females are consistently newly hired at the rank of full professor.

At the two highest ranks, men have held their positions longer than women have. The majority of male faculty have held their positions for eleven years or more. Conversely, at the two lowest ranks displayed on Table 18, women have held their positions longer.

At the graduate level the number of male and female faculty members is about the same. Baccalaureate female faculty outnumber male faculty.

TABLE 18

Years on Full-time Faculty, by Level of Program, Rank, and Gender

		Female	52	159	91	159	463

Tenure

Tables 19 and 20 display the proportion of full-time faculty members with tenure. Table 19 shows that faculty with doctorates are more likely to be tenured, than are faculty who only hold master's degrees. Table 20, however, shows that among assistant professors, faculty holding doctorates are slightly less likely to be tenured than are faculty holding master's degrees. Table 20 indicates that 64.2 percent of all tenured faculty are males. At the rank of professor, more men than women are likely to have tenure. This pattern is most pronounced at the graduate level. Except for the rank of full professor, at the baccalaureate level tenure is more evenly distributed between males and females.

Salary

Tables 21 through 23 report data on median salaries of full-time faculty members assigned at least 50 percent of the time to social work education. Table 21 represents the median salary and middle 50 percent (interquartile) range of full-time faculty members in the three principal academic ranks and for each of the ten regions of the U.S. Department of Health and Human Services. In Table 21 all salary data are based on a nine-month academic year. If the salaries were reported for more or less than nine months, they were reduced or increased proportionately. The median salaries for each rank decrease from professor to assistant professor, as expected. Regions 1, 2, 3 and 5 have the highest median salaries for professors employed in graduate/joint programs. Five regions have median salaries above

TABLE 21

Median Salary and Middle 50 Percent Salary Range of Full-time Nonadministrative Faculty, by Rank, Geographic Region, and Level of Program[1]

Rank	Region*	Graduate and Joint			Baccalaureate		
		Median Salary	Middle 50% Range	# of Faculty	Median Salary	Middle 50% Range	# of Faculty
Professor	1	$55,665	$51,278 - 68,894	25	**	** **	3
	2	58,977	49,718 - 63,310	68	**	** **	3

	Total	32,908	29,803 - 35,780	388	27,576	24,665 - 30,575	201

* See Table 1 for a list of states in each region.

** Less than five cases reported.

1 The salary data are based on a nine-month academic year.

the group median for graduate associate professors, while four regions have median salaries for assistant professors at the graduate level above the group median. Among professors employed in baccalaureate programs the highest median salaries are reported in Region 10. The lowest median salaries at the baccalaureate level for the three reported ranks were reported in Regions 7, 7, and 4. The amount of unreported information on faculty data accounts for 16 percent of the total information. Caution is advised, therefore, in comparing across years. This is especially true this year at the baccalaureate level where incomplete reporting in several instances reduced the reportable faculty data below the minimum thought to insure confidentiality.

Table 22 presents salary statistics for full-time faculty members with different primary responsibilities. It presents two groups of medians and ranges for salary. In the first group, labeled "adjusted salary," all salaries were adjusted according to the nine-month academic year. Salaries based on less or more than this basis were reduced or increased accordingly. The second group, labeled "unadjusted salary," represents whatever salary was reported, regardless of the number of months on which it was based. The data show that deans/directors and associate deans/directors of graduate/joint programs earn the highest salaries and that those faculty who have primary responsibilities related to the field earn the least. The widest salary range occurs in responsibility for classroom teaching, which also contains the greatest number of faculty.

TABLE 22

Salary Median and Range of Full-time Faculty, by Primary Responsibility and Level of Program

Level	Primary Responsibility	Salary				Number With Salary Reported
		Adjusted for Months		Unadjusted for Months		
		Median	Range	Median	Range	
Graduate and Joint	Class Teaching	40,000	14,355-91,775	41,614	15,780-91,775	1,130
	Class and Field	35,247	14,355-65,960	37,079	19,140-72,039	75
	Field Teaching/Liaison	32,431	19,530-50,250	34,100	24,408-64,741	77
	Dean/Director	50,981	25,722-96,991	67,008	26,000-129,322	83
	Assoc. Dean/ Director	46,019	28,855-65,755	54,084	25,649-85,213	54
	Assist. Dean/Director	35,280	22,068-56,438	45,255	29,424-75,250	28
	Dir./Undergraduate Pgm.	36,736	27,483-59,824	40,818	27,483-60,200	37
	Dir./Field Instr.	32,221	20,119-51,784	38,015	22,000-63,292	74
	Assist. Dir/Field Instr.	33,143	21,750-44,000	41,831	27,960-46,545	21
	Director/Admissions/ Minority Recruit.	35,670	18,132-60,785	40,580	24,176-61,315	30
	Director/Continuing Ed./ Work Study	34,270	21,375-59,296	41,838	25,000-62,270	25
	Other Administration	39,226	19,808-69,000	44,503	25,000-81,312	102
Bacca-laureate	Class Teaching	31,000	11,016-76,302	31,799	12,240-81,220	375
	Class and Field	25,000	12,105-38,167	25,938	16,140-41,080	26
	Field Teaching/Liaison	27,000	12,300-43,836	30,500	16,400-43,836	29
	Dean/Director	32,564	16,461-66,276	35,000	18,290-88,368	191

At the baccalaureate level there is little median salary variation. Baccalaureate deans/directors earn the highest salaries, and show the widest salary range in the category of primary responsibility.

Salary in Relation to Gender and Ethnicity

Table 23 compares the median salaries of men and women and of White and ethnic minority faculty members of the same rank, degree, and level of program. Because of disparity between the sexes in higher and lower-paying job responsibilities, only those instructors whose primary assignment is classroom teaching were included in the analysis. Within graduate/joint programs, White male professors with doctorates have the highest median income, while White females and ethnic professors lag behind. White male professors with master's degrees earn more than ethnic female professors do and earn the same as do ethnic male professors with doctorates. Other comparisons at the graduate/joint level vary with no prominent pattern. Baccalaureate faculty members at comparable ranks earn less than do faculty employed in graduate/joint programs. Faculty with master's degrees tend to earn less than do faculty with doctorates, but this pattern is not as pronounced at the baccalaureate level of employment.

TABLE 23

Median Salary of Full-time Classroom Faculty
by Rank, Ethnicity, Highest Earned Degree, Gender, and Level of Program

Level	Rank	Ethnicity	Degree and Gender			
			Doctorate		Master's	
			Male	Female	Male	Female
Graduate and Joint	Professor	White	$52,920	$52,605	$49,907	**
		Ethnic	49,907	48,944	**	45,231
	Associate Professor	White	41,518	42,240	42,839	39,807
		Ethnic	42,300	38,880	44,820	39,400
	Assistant Professor	White	33,549	33,280	31,713	31,957
		Ethnic	31,560	33,375	33,124*	31,277
Baccalaureate	Professor	White	44,066	45,852*	35,194	35,320*
		Ethnic	45,000*	**	**	**
	Associate Professor	White	35,094	33,980	35,000	32,182
		Ethnic	34,163	34,453	39,000*	33,005
	Assistant Professor	White	30,000	29,890	27,000	26,210
		Ethnic	30,000*	30,000	25,172	26,000

* Median based on less than ten cases.

** Categories of rank or ethnicity omitted where the data available are based on less than five cases.

Percentage of Salary from Internal University Sources Versus External Sources

Table 24 shows that most of the funds for faculty salaries continue to come from internal university sources. Only five groups, three in graduate/joint programs and two at the baccalaureate level, receive more than 5 percent of their salaries from external funds. They include full-time faculty members with a primary responsibility in field instruction at each level. The other groups are those whose primary responsibility is in the "Other" category. The "Other" category had substantial increases in external funding over past years where only part-time faculty with "Other" responsibilities had less than 85 percent funding from internal university sources. At the graduate/joint level both full and part-time faculty with "Other" responsibilities receive less than 80 percent funding from internal university sources.

TABLE 24

Percentage of Salary from Internal University Sources,
by Level of Program, Primary Responsibility, and Type of Appointment

Level	Primary Responsibility	Type of Appointment		Total
		Full-time	Part-time	
Graduate and Joint	Class Teaching	98.8	98.9	
	Class and Field	98.0	100.0	
	Field Teaching or Liaison	94.9	96.3	
	Other	64.3	77.4	96.9
Bacca-laureate	Class Teaching	99.3	95.8	
	Class and Field	100.0	100.0	
	Field Teaching or Liaison	93.1	100.0	
	Other	48.0	100.0	95.9

Number of Publications

Respondents were instructed to report the number of publications that actually appeared in print for each faculty member during the most recent 12 month period conforming to their record-keeping system. They reported on five categories of publications: (1) articles in refereed journals; (2) books published by formal publishing companies; (3) chapters in books published by formal publishing companies; (4) external reports or monographs; and (5) book reviews. To adjust for multiple authorship, respondents were instructed to report fractions, such as .5 for publications with one co-author, .33 for publications with two coauthors, and so on. It was difficult to know if respondents actually followed these instructions, especially if an individual faculty member published more than one item in any given category. The results in this section should be considered with great care.

On average, faculty members published .42 articles, .16 books, .17 book chapters, .24 monographs, and .14 book reviews. These averages are misleading, however, as relatively few faculty reported publishing at all. Among the group of faculty members publishing at least one item (n=1053), the averages are 1.11 articles, .42 books, .47 book chapters, .65 monographs, and .37 reviews. More faculty reportedly published the same amounts in this academic year as in last year. Those faculty who publish one article remain prolific, compared to all faculty. With the exception of those writing monographs and reviews, the baccalaureate faculty, on average tend to publish less than their graduate/joint counterparts do.

BACCALAUREATE STUDENTS

Baccalaureate student data were submitted by 307 (84.8 percent) of the 362 baccalaureate programs accredited at the time of this survey. Table 25 displays the distribution of the data from respondent programs by the size of their junior and senior enrollments. Institutions vary regarding the time of declared majors; therefore, only the junior and senior years were examined when comparing enrollment sizes. Almost 60 percent of the baccalaureate programs have less than 50 students in the junior and senior years, 75 percent have less than 75 students, and the modal category is under 25. The median junior/senior year enrollment size is 41.5 Until 1984, there was a trend toward declining median junior/senior enrollment size - a trend that had been linked to the introduction of new baccalaureate programs, but that was reversing until now. This is the first time in five years that the median junior/senior enrollment size decreased.

TABLE 25

Accredited Baccalaureate Programs by Size of Full-time Junior and Senior Year Enrollment

Junior and Senior Enrollment	#	%
Under 25	89	29.3
25 - 49	86	28.3
50 - 74	54	17.8
75 - 99	36	11.8
100 - 149	30	9.9
150 and over	9	3.0
Total	304*	100.0

* Three programs did not provide data on this item.

The total reported enrollment of full-time degree students (including those in their freshman and sophomore years) is 26,154. Of these, 16,530 are in their junior/senior year and 10,135 are in their freshman or sophomore year. An additional 4,762 part-time degree students were reported, as well as 16,646 other students not working toward a degree in social work but taking social work courses.

In the past, enrollments in baccalaureate programs were declining. In 1983, the rate of decline decreased. From 1984 through last year (1988), there was an increase in every one of the above categories of enrollment. A direct program by program comparison of response rates was not possible this year. In 1989, there was a decrease of 6.3 percent in the total number of full-time degree students, 0.2 percent in the number of full-time juniors and seniors, 12.3 percent in the number of full-time freshmen and sophomores, an increase of 8.3 percent in the number of part-time degree students, and a 4.8 increase in the number of other (nondegree) students taking social work courses.

Table 26 displays the distribution by gender of the full-time junior and senior enrollment and of students awarded degrees. The proportion of women among juniors and seniors enrolled (84.1 percent) remained constant. Their proportion among those awarded degrees also remained the same between this year and last.

TABLE 26

Juniors and Seniors Enrolled Full-time in Baccalaureate Programs,
11/1/89, and Students Awarded Baccalaureate Degrees, 1988-89, by Gender*

Gender	Juniors and Seniors Enrolled		Students Awarded Degrees	
	#	%	#	%
Female	13,465	84.1	6,160	85.2
Male	2,540	15.9	1,070	14.8
Not Reported	525	*	*	*
Total	16,530	100.0	7,230	100.0

*Unreported data were not used in percentage calculations. Totals may not correspond between tables because of variation in item response rates.

Table 27 displays the ethnic distribution of full-time junior and senior enrollments and of students awarded degrees. Between Academic Years 1988 and 1989, the proportion of full-time enrolled ethnic minority students declined (1.1 percent). The proportion of degrees awarded to ethnic minority students remained stable at 22.2 percent in 1988 and 22.4 percent in 1989.

The largest group of ethnic minority students is Black, comprising 13.0 percent of juniors and seniors and 14.3 percent of degrees awarded. Chicano and Puerto Ricans have the second largest proportion of enrollment. Ethnic and White student and graduate proportions fluctuated slightly this year, as in past years. These fluctuations appear driven by the varying response rates of the programs in reporting data on ethnicity.

TABLE 27

Juniors and Seniors Enrolled Full-time in Baccalaureate Programs, November 1, 1989,
and Students Awarded Baccalaureate Degrees, 1988-1989, by Ethnicity

Ethnicity	Juniors and Seniors Enrolled		Students Awarded Degrees	
	#	%	#	%
Asian American	254	1.6	110	1.5
Black	2,088	13.0	1,033	14.3
Chicano	544	3.4	177	2.4
Native American	204	1.3	57	0.8
Puerto Rican	474	2.9	181	2.5
Other	196	1.2	60	0.8
White	12,266	76.2	5,575	77.0
All Ethnic Minorities	3,760	23.3	1,618	22.4
Foreign	80	0.5	45	0.6
Total	16,530	100.0	7,238	100.0

* Totals may not correspond between tables on column addition because of variation in item response rates.

GRADUATE STUDENTS

Enrollment

The number of full-time enrollments in master's programs increased every year between 1955 and 1978. Enrollment then fell each year between 1979 and 1983, leveling off in 1984 and 1985. This year the enrollments decreased again; however, since 1985, not all programs have responded to this portion of the annual survey. From 1981 through 1987 as the number of students enrolled full-time declined, the number of students enrolled part-time increased. The number of enrolled part-time master's students, however, has steadily increased since 1976. The number of part-time students enrolled in master's programs in 1989 was 9,420 as compared to 9,024 in 1988, a 4.4 percent increase. Part-time students make up 35.4 percent of the total master's enrollment, and in 17 programs, part-time students outnumbered full-time students. In 41 graduate programs, part-time students comprised 40 percent or more of the student body.

Trends in the enrollment levels of doctoral programs resemble those of master's programs. Full-time enrollment also decreased, from 1,003 in academic year 1988 to 857 this year. Part-time enrollment increased, with enrollment rising from 911 in academic year 1988 to 989 in 1989, an 8.6 percent increase. The reported proportion of full-time doctoral enrollment was less than that of part-time, 46.4 versus 53.6 percent.

TABLE 28

Students Enrolled in Master's and Doctoral Programs 1964-1989**

Year	Master's Programs	Doctoral Programs	Year	Master's Programs		Doctoral Programs	
	Full-time	Full-time		Full-time	Part-time	Full-time	Part-time

1976	16,869	769	1989	15,777*	9,420*	857*	989*

* Response rate less than 100 percent.

** 92 of 97 master's programs and 43 of 47 doctoral programs responded to this portion of the survey.

Applications and Admissions to Master's Degree Programs

Table 29 displays data on applications and admissions for 1988 and 1989. These data show a 1 percent increase in all applications to master's programs in 1989. Applications to full-time programs decreased 1.1 percent, but increased 5.9 percent to part-time programs. The percentage of applications considered for full-time programs decreased (2.2 percent) this year, as part-time program application acceptance increased 1.4 percent. The percentage of applications accepted in part-time programs (65.3 percent) is higher than in full-time programs (59.5 percent). The percentage of accepted applicants in part-time programs who eventually register is 14.3 points higher than in full-time programs, a 1.3 percent increase.

TABLE 29

Applications for Admission to First-year Master's Degree Programs in 1988 and 1989, by Action Taken*

Year	Program	Action							
		Total Received		Considered for Admission		Accepted		Registered	
		#	%	#	%	#	%	#	%
1989	Full-time Programs	17,174	100.0	14,595	85.0	10,214	59.5	6,415	37.4
	Part-time Programs	7,994	100.0	7,004	87.6	5,219	65.3	4,129	51.7
	Total	25,168	100.0	21,599	85.8	15,433	61.3	10,544	41.9
1988	Full-time Programs	17,372	100.0	15,147	87.2	10,641	61.3	6,691	38.5
	Part-time Programs	7,548	100.0	6,478	85.8	4,663	61.8	3,904	51.7
	Total	24,920	100.0	21,625	86.8	15,304	61.4	10,595	42.5

*92 of 97 programs reported data.

Table 30 displays Academic Year 1989 data regarding applications for advanced standing. The majority of applications come from graduates of baccalaureate programs in social work (BSW), 76.1 percent of which are from other schools not under the auspices of the schools receiving the applications. Applications from the BSW graduates from the same school as the master's program have higher rates of acceptance and enrollment (75.4 and 57.4 percent, respectively) than do those from other schools (72.9 and 51.3 percent, respectively). Overall 53 percent (52.6) of the students who apply for advanced standing actually enroll.

TABLE 30

Applications for Advanced Standing Status in Master's Degree Programs in 1989, by Source/Basis and Action Taken*

Action	Source or Basis							
	Baccalaureate Social Work Programs				Other Education		Total

Enrolled	359	57.4	1,018	51.3	74	50.0	1,451	52.6

*92 of 97 programs reported data.

Degrees Awarded

While enrollments at the master's level dropped in recent years, so did the number of master's degrees awarded, as shown in Table 31. From 1980 to 1984, the number of degrees awarded declined. In 1986 they began to increase and have continued to do so until this year. The declining trend in degrees awarded may be a result of lower response rates this year. The number of master's degrees awarded (9,509) this year is lower than last year's number (9,891), a 3.9 percent decrease. The degrees awarded by doctoral programs decreased between 1988 and 1989, from 332 to 189. The response rate to this portion of the survey was 100 percent last year and lower this year, accounting for much of the decrease.

TABLE 31

Graduate Students Receiving Master's and Doctoral Degrees, Academic Year 1963-64 Through 1988-89**

Academic Year	Master's Degree	Doctoral Degree	Academic Year	Master's Degree	Doctoral Degree
1963-64	2,815	38	1976-77	9,254	179

Characteristics of Graduate Students

Table 32 displays the distribution by gender of enrollments and degrees awarded. In recent years the percentage of women enrolled and receiving degrees at the master's and doctoral levels has increased. Since 1985 that trend seems to have stabilized. Women make up 81.2 percent of full-time and 80.1 percent of part-time master's students, and receive 81.6 percent of master's degrees awarded. In contrast, women make up 68.5 percent of full-time enrollment in doctoral programs and receive 65.1 percent of doctoral degrees awarded. The latter figures represent a decrease of 5.6 percent in female doctoral students and a 4.8 percent increase in doctoral graduates who are female.

The age distribution of male and female graduate students is displayed in Table 33. Among full-time master's students the modal age category for women is under 26. For men it is 31 to 40. For part-time master's students the modal category for each gender is 31 to 40. The modal age category for men in doctoral programs is 31 to 40. This applies to part-time as well as full-time enrollments. For women, the mode is over 40 for full-time and part-time enrollments.

TABLE 32

Percentage of Full and Part-time Master's and Full-time Doctoral Students, Enrolled 11/1/89, and Students Awarded Degrees 1988-89, by Gender*

Gender	Master's Students				Doctoral Students	
	Enrolled			Awarded Master's Degrees	Enrolled Full-time	Awarded Doctoral Degrees
	Full-time	Part-time	Total

Table 34 displays the ethnicity of graduate students enrolled and of those awarded degrees. Ethnic minorities make up 16.5 percent of full-time and 17.8 percent of part-time master's program enrollment and received 15.2 percent of master's degrees awarded. Additionally, ethnic minorities make up 21.2 percent of full-time and 16.3 percent of part-time doctoral student enrollment and received 14.8 percent of doctoral degrees awarded. Blacks are the ethnic minority group with the highest percentage of enrollment and degrees awarded at both graduate levels.

TABLE 34

Percentage of Master's and Doctoral Students Enrolled 11/1/89, and Students Awarded Degrees 1988-89, by Ethnicity*

Ethnicity	Students Enrolled				Awarded Degrees	
	Master's		Doctoral		Master's	Doctoral
	Full-time	Part-time	Full-time	Part-time		
Asian American	1.5	1.0	2.6	0.8	1.4	3.2
Black	9.0	10.6	13.0	10.3	8.0	10.1
Chicano	2.0	2.3	1.9	1.2	2.0	0.0

* Percentages may not equal 100 because of item nonresponses to specific items.

Type of Concentration

Tables 35 and 36 display the distribution of all master's students by their primary classroom concentration. Table 35 shows the distribution of students by concentration in methods categories. It shows how many students are concentrating in each method by itself or in combination with a field of practice or social problem category. Table 36 reports the primary field of practice or social problem concentration distributed across the field of practice or social problem category. These two tables report the same information. Table 36 has a different organizational focus than Table 35 has. Both tables include all master's students, first and second year, full-time as well as part-time.

Table 35 indicates that 97.6 percent of all master's students have or will have a methods concentration and that 61.5 percent of those with a methods concentration take it in combination with a field of practice or social problem concentration. The most prominent methods concentration is direct practice, which applies to 60 percent of all students, 63.2 percent of those with a methods concentration and 66.7 percent of those with a direct practice concentration combined with another method. The generic category is next in prominence, applying to 11.1 percent of all students. Only 2.3 percent of all students concentrate in a field of practice or social problem alone.

Table 36 shows that mental health is the most prominent field of practice or social problem concentration in the classroom, and this concentration applies to 26.2 percent of master's students. Health, family services, and other field of practice follow with 14.3, 13.3, and 12.2 percent, respectively, of master's students in these fields of practice. Over 4,400 students had not determined their primary field of practice and 9,287 are in methods concentrations only. These figures represent slight increases in student percentages within categories, but not in the categories themselves. Compared to 1988, in 1989, 12 percent more students had not determined their primary field of practice, and 5.7 percent more students are in methods concentrations only. These increases reflect a shift toward a concentration in methods only. Although all master's programs provided data on students, not all programs completed this portion of the survey. Caution in interpreting the data is advised.

TABLE 35

Master's Degree Students Enrolled 11/1/89, by Primary Methods Concentration

Methods	Concentration Framework							
	Methods Only		Methods Combined with Field of Practice or Social Prob.		Field of Practice or Social Problems Only (No Methods)		Total

*The totals do not correspond between tables or with totals reported in the text due to item nonresponses.

Field of Practice in Field Instruction

Information on field of practice in field instruction is displayed in Table 37. Approximately one-quarter (26.7 percent) of master's students were assigned to field instruction in mental health. An additional 13.5 percent were assigned to field instruction in health, 13.0 percent to family services, and 10.5 percent to child welfare. Almost two-thirds (63.7 percent) of all placements are in the foregoing four fields. More than 9,758 students either had no primary field of practice in their field instruction or had not yet been assigned.

TABLE 36

Financial Aid

Table 38 reports the proportion of students in each ethnic group receiving financial aid. Percentages were calculated in reference to the number of students enrolled full-time within each given ethnic group. For full-time master's students 53.6 percent are receiving grants as compared to 54.9 percent of full-time doctoral students. The data also indicate that ethnic minority students are more likely to receive financial aid than are White students, although this pattern is less pronounced at the doctoral level. Blacks are the most likely to receive grants among master's students, while Puerto Ricans and Asian Americans are the most likely to receive doctoral financial aid. Among ethnic minorities Puerto Ricans have the lowest pertcentage of aid recepients in master's programs as do Native Americans in doctoral programs.

TABLE 38

Full-time Master's and Doctoral Students Receiving Financial Grants 11/1/89, by Ethnicity

Ethnicity	Master's Students		Doctoral Students	
	#	%	#	%
Asian American	148	60.7	22	95.7

Total	8,506	53.6	487	54.9

Table 39 displays the number of financial grants awarded in 1989 and the sources of the grants. Twelve percent of all grants awarded to master's students are paid directly by field instruction agencies. Funds paid by these agencies come from a wide variety of sources. The two most common federal sources are the Veterans Administration and "Other" sources. Other prominent sources of grants paid directly from field instruction agencies include state or local governments and voluntary social welfare agencies. The most common federal source of funds not tied to field instruction is FCWSP, which accounts for 6.6 percent of all grants awarded to master's students. Prominent non-federal sources are formal loan programs, accounting for 35.4 percent of all grants, and the school or university, accounting for 26.1 percent of all grants not tied to field instruction. For doctoral students, the most common source of grants are the school or university (33.5 percent), research or graduate internships (38.3 percent), and formal loan programs (8.6 percent). The most prominent federal source of funds for doctoral students is "Other".

Student-Faculty Ratios

Data on student-faculty ratios are displayed in Table 40. In calculating the total number of students per program for these ratios part-time students were counted as one-half, and each faculty member was counted according to the precise full-time equivalent percentage of time he or she is assigned to the doctoral or master's level as reported by respondents. For example, a full-time faculty member teaching 50 percent at each level would be counted as 50 percent at each level. Likewise, half-time faculty members dividing their time equally between the two levels would be counted as 25 percent at each level, and so on. The median student-faculty ratio in master's programs is 11.9. Doctoral programs tend to have lower student-faculty ratios. Their median is 9.8.

TABLE 40

Student-faculty Ratios in Master's and Doctoral Programs, 11/1/89

Student-faculty Ratio	Master's Programs		Doctoral Programs	
	#	%	#	%
Less Than 6	3	3.4	5	13.2
6 - 8	14	16.1	12	31.6
9 - 11	27	31.0	6	15.8
12 - 14	29	33.3	5	13.2
15 and over	14	16.1	10	26.3
Total	87	100.0	38	100.0
Median	11.9		9.8	

CANDIDATE SCHOOLS

There are 32 programs currently in candidacy; ten master's programs and 22 baccalaureate programs. The master's candidacy programs graduated 127 students and the baccalaureate programs graduated a total of 359 students. The overall distribution of ethnicity for graduates of master's programs in candidacy (27.7) was higher than that of fully accredited master's programs (15.2). The distribution within ethnic categories was higher for Chicano graduates. The proportion of ethnicity for baccalaureate graduates of programs in candidacy was also higher than that of graduates of fully accredited baccalaureate programs, especially that of Native Americans. Gender distributions were the same as those of all fully accredited programs. Table 41 displays the data on graduates of schools in candidacy.

TABLE 41

Characteristics of Graduates of Programs in Candidacy by Ethnicity and Gender

	Baccalaureate Prgms. in Candidacy			Master's Prgms. in Candidacy

RECENT TRENDS IN SOCIAL WORK EDUCATION

This section highlights selected five-year trends, as displayed in Tables 42 and 43. Table 42 displays the trend data for baccalaureate programs. As noted in the footnote accompanying this table, it is unclear to what extent variation in response rates drives what appear to be trends over time. The most consistent trends apear to be a gradual decline of ethnic minority faculty members, an increase in the percent of faculty members with doctorates, and the increasing number of students not working toward a degree in social work who are taking social work courses. The number of degrees awarded decreased this year by four percent. Full-time enrollments this year were considerably higher than last, and appear to represent an overall upward trend. The percentage of women enrolled did not decline this year, nor did that for ethnic minority enrollment. There were increases in each category, but each is only beginning to approximate the higher percentages of five years ago.

TABLE 42

Percent Ethnic Minority	24.7	22.7	21.2	22.2	22.4

*These trends should be interpreted cautiously because response rates vary from year to year.

Table 43 displays the trend data for graduate programs. Caution should be used in comparing the 1989 figures on students to those of earlier years due to the varying response rates of recent years. In prior years no more than one graduate program failed to respond to the annual survey. Since 1985 the number has exceeded three and this year five programs failed to return student schedules, while seven more returned some, but not all, schedules. Despite the large non-response rates in past years, it appears that the steep declines in enrollments in and applications to master's programs that occurred in the late 1970's and early 1980's have leveled off. This year enrollment decreased at the master's level by less than one and by three and one half percent at the doctoral level. Other trends include the slow increase in the proportion of faculty holding doctorates, and an increase over time in the proportion of women faculty members at all ranks. The rise in recent years in the number of part-time master's and doctoral students continued this year, with both program levels showing increases in part-time students. Another trend is the increase over time in the proportion of women in full-time doctoral study, although this year showed a decrease. The percentage of women in doctoral studies is now 68.5 percent, 12.6 percentage points lower than that of women in full-time master's programs. While median salaries appear to have risen over time, these figures are unadjusted for inflation.

ISBN 0-87293-029-7

FOREWARD

Statistics on Social Work Education in the United States is published annually by the Council on Social Work Education. Data are provided by CSWE accredited baccalaureate and master's degree social work education programs. Data on the number of students receiving degrees cover the academic year 1989-90. All other data are reported as of November 1, 1990.

Special appreciation is extended to Dr. Elaine Spaulding who compiled and analyzed the data and wrote this report. I also would like to express my appreciation to the program deans, directors, faculty and staff for their cooperation in completing the survey instruments.

Donald W. Beless
Executive Director

February 15, 1991

INTRODUCTION

This report contains information on U.S. social work education programs, faculty, and students. The data contained in the report were supplied by 96 (97 percent) of the 99 CSWE-accredited graduate social work education programs in the United States. Three hundred eleven (85.2 percent) of the 365 CSWE-accredited baccalaureate programs in the United States also provided data. Doctoral information was provided by 46 (90 percent) of the 48 social work doctoral programs. At the time of the survey there were 39 master's programs, 61 master's programs jointly administered with baccalaureate programs ("joint programs"), and 297 baccalaureate programs. Thirty nine programs were in candidacy (preaccredited staus); fourteen at the master's level and 25 at the baccalaureate level. Additionally, there were nine master's programs in candidacy jointly administered with accredited baccalaureate programs, and two baccalaureate programs in candidacy jointly administered with accredited master's programs. When faculty data from programs in candidacy were reported they were included in all faculty tables. However, the tables on student data include only those programs already accredited. Information on students from candidate schools is included this year in separate tables. Programs accredited during the period of the survey are listed in Appendix A.

The tables presented in the report consist of tabulated responses to four surveys: (1) Schedule I - Social Work Education Programs and Faculty; (2) Schedule II - Statistics on Baccalaureate Social Work Education Programs; (3) Schedule III - Statistics on Master's Social Work Programs; (4) Schedule IV - Statistics on Doctoral Social Work Programs; and (5) Candidate Schedules. Due to varying item-specific response rates, totals across tables may not be equal. Total response rates are indicated in the text tables and individual program response information is indicated in the reference tables.

The rate of response from graduate and undergraduate programs remained about the same as last year. Until 1983, however, graduate program information represented the total population and only one or two programs omitted item-specific information. Since then a growing percentage of programs increasingly omitted data on several items. More prominent of these omitted items are faculty salaries and publications. Due to this phenomenon, increased attention should be paid to the total response rates indicated on the faculty salary tables. The definition of full-time faculty as spending more than 49 percent of his or her time in social work-related activity was maintained to ensure the comparability of these findings with earlier editions of Statistics on Social Work Education. Additionally, because of fluctuating item-specific response rates, caution should be taken in interpreting the results of tables containing small cell data.

SOCIAL WORK EDUCATION PROGRAMS

Geographic Distribution

Table 1 displays the geographic distribution of 337 programs that responded to this portion of the canvass. While there are a greater number of baccalaureate programs than both levels of graduate programs in the United States, joint programs have a higher concentration of faculty. Region 6 has the greatest number of programs at the graduate level; Region 5 has the greatest number of programs at the baccalaureate level. Region 5 also has the largest number of faculty employed at all levels. In contrast, the Northwest (Region 10), and the Central Plains States (Region 7) have relatively few programs or faculty. All of these figures should be considered in light of the population sizes in the various regions.

Institutional Characteristics

Most programs are in state colleges or universities. As shown in Table 2, 194 (57.6 percent) of all respondent programs and 68 (72.3 percent) of graduate or joint programs are located in public colleges or universities. At the baccalaureate level, however, the programs are more evenly distributed between state and private programs with 126 (51.8 percent) programs housed in public institutions. Baccalaureate programs with private auspices continue to be predominantly church-related institutions (81.2 percent). In contrast, 17 (18 percent) private graduate and joint programs are under other institutional arrangements. All but seven respondent programs in public institutions are in state colleges or universities. The distribution of respondent programs and faculty by institutional auspices varies little from year to year.

TABLE 1

Number of Educational Programs and Faculty, by Geographic Region and Level of Program[1]

	Level of Program							
	Graduate Only		Joint		Baccalaureate		Total	
*Region	Programs	Faculty	Programs	Faculty	Programs	Faculty	Programs	Faculty
1	3	149	3	65	17	93	23	307
2	4	93	6	414	23	136	33	643
3	3	98	9	303	36	149	48	550
4	4	90	8	247	45	204	57	541
5	4	173	15	501	46	260	65	934
6	5	137	6	115	25	133	36	385
7	1	46	5	165	30	112	36	323
8	2	66	2	21	10	45	14	132
9	3	131	8	192	5	74	16	397
10	1	40	2	93	6	35	9	168
Total	30	1,023	64	2,116	243	1,241	337	4,380

*The regional classification is based on the Federal regions of the U.S. Department of Health and Human Services. The States in each region are:

Region 1 - Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont
Region 2 - New Jersey, New York, Puerto Rico, and the Virgin Islands
Region 3 - Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia
Region 4 - Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee
Region 5 - Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin
Region 6 - Arkansas, Louisiana, New Mexico, Oklahoma, and Texas
Region 7 - Iowa, Kansas, Missouri, and Nebraska
Region 8 - Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming
Region 9 - Arizona, California, Hawaii, and Nevada
Region 10 - Alaska, Idaho, Oregon, and Washington

Social work programs are located primarily in non-ethnic, coeducational colleges or universities (87 percent). This majority includes 86.2 percent of graduate, 90 percent of joint, and 87 percent of baccalaureate programs. Only 14 social work programs are organized around ethnic identification or gender. Only 4 graduate and joint (5 percent) and 10 (4.2 percent) baccalaureate programs are in non-ethnic women's colleges. Additionally 4 joint (7 percent) and 18 baccalaureate (5.5 percent) are in Black, coeducational institutions. One graduate, one joint, and four baccalaureate programs indicated they are located in Other Ethnic, Coeducational institutions.

Graduate and joint programs are more frequently found in institutions with relatively large student enrollments, while baccalaureate programs are more likely to be located in institutions with small student enrollments. As shown in Table 3, jointly administered programs are more likely to be located in larger institutions than are graduate programs not jointly administered with baccalaureate programs. Slightly more than fifty percent (51.6 percent) of graduate and joint programs are in institutions with at least 20,000 students enrolled as compared to 7.8 percent of baccalaureate programs. In contrast, the majority of baccalaureate programs are in institutions with less than 10,000 enrolled students; 53 percent are in institutions with less than 5,000 enrolled students.

1 The numbers in this table represent only those programs that responded to this part of the survey. The number of graduate social work education programs accredited by CSWE is 99. CSWE-accredited baccalaureate social work education programs number 366.

TABLE 2

Number of Educational Programs and Faculty, by Institutional Auspices and Level of Program [1]

20,000 and over	14	33	19	66
Total	28	64	243	335

Number of Faculty

Graduate and joint programs have larger faculties than baccalaureate programs, as displayed in Table 4. Ninety-two (92.9 percent) percent of baccalaureate programs have fewer than ten faculty members. In comparison, one graduate program and one joint program had fewer than 10 faculty members, while 58.6 percent of graduate and 40.6 percent of joint programs had 30 or more faculty members. The mean number of faculty members for graduate/ joint programs is 34.3. The mean number of faculty members in baccalaureate programs is 5.2.

1 The numbers in this table represent only those programs that responded to this part of the survey. The number of graduate social work education programs accredited by CSWE is 99. CSWE-accredited baccalaureate social work education programs number 365.

Total	29	64	242	335

SOCIAL WORK FACULTY

Time in Social Work Education

Sixty percent of all faculty members are appointed full-time to their institutions and spend 100 percent of their time in the social work program. As displayed in Table 5, 58.8 percent of the faculty members in joint programs are appointed full-time and dedicate 100 percent of their time to the social work program. In graduate programs 63.3 percent are full-time faculty working 100 percent of their time in social work programs as are 62.2 percent of baccalaureate faculty members. A small additional percentage of faculty at each program level are appointed full-time and spend at least one-half, but not all, of their time in the social work program. Less than two percent of the faculty members in all programs spend less than one-half of their time in social work while holding full-time appointments. For 2.8 percent of the full-time faculty members in baccalaureate programs, less than 50 percent of their time is dedi-

TABLE 5

Faculty, by Percent of Time in Social Work Education and Type of College/University Appointment

cated to social work programs. A greater percentage of the faculty members in joint programs are employed part-time than those in graduate and baccalaureate programs; 26.4, 18.8, and 10.7 percent, respectively.

The distribution of time allocated to baccalaureate and graduate social work education for faculty members in joint programs is displayed in Table 6. This year's responses indicated an increase in the distribution of time spent exclusively in graduate and baccalaureate activities, as well as in most to baccalaureate activities. Decreases were reported in all other categories. Caution must be used in interpreting these findings, however, because they may be driven by varying response rates.

TABLE 6

Faculty in Jointly Administered Programs,
by Time Assigned to Graduate and Baccalaureate Social Work Education (1989, 1990)

Time Assigned to Graduate and Baccalaureate Social Work Education	1989		1990		% Change
	#	%	#	%	
All to Graduate	1,016	52.9	1,112	54.7	1.8

Total	1,911	100.0	2,034	100.0	

Table 7 shows the percentage of time assigned to the doctoral level among full-time faculty in those graduate programs which reported assignment of faculty members to doctoral education in social work. Among these programs, 59.3 percent of the full-time faculty members have no teaching assignment at the doctoral level. Twenty percent of the faculty spend some but less than one-fourth of their time in doctoral activities, while only 7.9 percent of faculty spend more than one-half of their time in these activities.

TABLE 7

Full-time Faculty in Programs Offering Doctoral Social Work Education,
by Percentage of Time Assigned to Doctoral Level*

Percent of Time Assigned to Doctoral Level	#	%

1 - 24	223	19.8
25 - 49	117	10.4
50 and over	89	7.9
Unknown	0	0.0
Total	1,125	100.0

*See Reference Table 300 for the number of full-time faculty listed by school.

Sex, Age, Ethnicity, And Earned Degrees

Table 8 displays the distribution of male and female faculty members by age groups. For this analysis, responses of graduate and joint programs were aggregated. The modal age group for men at the graduate/joint level in this year was 45-54, while the modal age group for graduate/joint female faculty members remained the same as it has been for the past six years (35 - 44). The average individual age, however, of women who are faculty at graduate/joint programs was higher than the aggregated modal age group, 46 years. The modal age group for men at the baccalaureate level increased from 35-44 years of age to 45-54. The modal age group for women baccalaureate faculty remained at 35-44. On average, baccalaureate faculty members are three years younger than their graduate/joint counterparts. Baccalaureate male faculty members have an average age of 46, while their female counterparts have the lowest average age, 44 years. Baccalaureate faculty members are more likely to be distributed among younger categories than are graduate/joint faculty. Women are more likely than men to be in the youngest category (under 35 years of age). If this age distribution remains somewhat constant in future years an increasing number of women are likely to be employed in social work faculty positions.

TABLE 8

Faculty, by Age, Gender, and Level of Program*

Level	Age	Gender					
		Male		Female		Total	
		#	%	#	%	#	%
Graduate and Joint	Under 35	46	3.3	100	6.0	146	4.8

	Total	528	100.0	662	100.0	1,190	100.0

*Totals may not correspond between tables because of variation in response rates.

The distribution of male and female faculty members among ethnic categories is displayed in Table 9. The proportion of men and women of minority ethnicity has remained relatively stable in recent years. Most faculty members of minority ethnicity at both the graduate/joint and baccalaureate levels are Black. Also, at both program levels, a greater percentage of women than men are of minority ethnicity. This pattern endures over time and is most pronounced among Black and Puerto Rican faculty members, particularly in baccalaureate programs. An equally stable reverse pattern is found for Chicano faculty members at both levels and for Asian-Americans in graduate/joint programs.

TABLE 9

Faculty, by Ethnicity, Gender, and Level of Program*

Level	Ethnicity	Gender					
		Male		Female		Total	
		#	%	#	%	#	%
Graduate and Joint	Asian-American	61	4.3	34	2.1	95	3.1

	Foreign	2	0.4	0	0.1	2	0.1
	Total	539	100.0	713	100.0	1,252	100.0

*The totals may not correspond between tables because of variation in item response rates.

The educational attainment of male and female faculty members is displayed in Table 10. A greater proportion of faculty members in graduate/joint programs have earned a degree higher than a master's, while most baccalaureate program faculty have not. All but a small fraction of faculty members with no higher than a master's degree have their master's in social work. In graduate/joint programs faculty members with doctorates in social work greatly outnumber individuals with doctorates in other disciplines. In baccalaureate programs, however, this disparity is less pronounced. The number of faculty members trained at the doctorate level had remained relatively constant since last year for both graduate/joint and baccalaureate programs. Last year, moreover, the percentage of faculty holding doctorates at the graduate/joint level reportedly increased by 10 percent for social work doctorates and seven percent for other doctorates.

It should be noted that the number of men holding doctorates at both the graduate/joint and baccalaureate levels is greater than the number of women holding advanced degrees. At the graduate/joint level 43 percent of men hold doctorates in social work as compared to 36.5 percent of women. At the baccalaureate level, 23.9 percent of men and 18 percent of women hold doctorates in social work. This pattern is more pronounced at the graduate/joint level for faculty members with doctorates in disciplines other than social work.

*The totals may not correspond between tables because of variation in response rates.

The distribution of highest earned degrees among faculty members is displayed by ethnic categories in Table 11. Asian-Americans have the highest percentage of doctorates at both the graduate/joint as well as the baccalaureate levels. Native American and Puerto Rican faculty have the second highest percentage of doctorates in graduate/joint programs, while "Other" (includes Other U.S. Minorities and foreign visitors on a visa) have the second highest percentage in baccalaureate programs. Except for Blacks and Whites, percentages reported in all categories of ethnicity are based on small numbers and should be interpreted cautiously.

*The totals may not correspond between tables because of variation in response rates.

The proportion of faculty members who hold master's degrees in social work is shown in Table 12 by each category of highest earned degree. In graduate/joint programs 89.9 percent of faculty members have master's degrees in social work, while in baccalaureate programs, 90.2 percent hold this degree. Seventy-three (73.2) percent of individuals with doctorates in social work and the 24.5 percent of those with doctorates in other disciplines also have a master's degree in social work. In graduate/joint programs 97.1 percent of faculty members have either a doctorate or a master's in social work, while 96.0 percent of their baccalaureate counterparts have a graduate degree in social work.

TABLE 12

Percentage of Faculty With and Without Master's Degrees in Social Work, by Highest Earned Degree and Level of Program*

*Does not include information for 148 faculty members with missing data.

Rank

Table 13 displays the distribution of faculty members by rank and gender at each program level. At the graduate/joint program level there are more faculty who are associate professors, but the percentages of professors and assistant professors are only slightly less. At the baccalaureate more faculty are assistant professors, and the second largest faculty rank is associate professor. Only 12.2 percent of baccalaureate faculty are professors. Graduate/joint faculty members are more likely to hold higher ranks than baccalaureate faculty. This pattern also persists for male and female faculty members: 71 percent of graduate professors are male and 73 percent of baccalaureate professors are male.

Table 14 displays the distribution of faculty members by rank, highest degree earned, and program level. Full professors at each level are more likely to have doctorates than master's degrees. At the graduate/joint level, doctorates are held by the majority of faculty at the top three ranks and by a small minority at other levels. The overall 2:1 ratio of faculty with doctorates in social work versus other doctorates has remained constant over the past six years. The distribution of the doctorates within and without social work has also remained unchanged within ranks.

Table 15 displays the distribution of rank by ethnicity. Asian-Americans, the group with the highest proportion of doctorates, also have the highest proportion of professors. Comparisons among categories in Table 15, or calculation of trends over time, should be made cautiously, due to the small number of faculty members in some categories of ethnicity and fluctuating response rates over time.

TABLE 15

Faculty, by Rank, Ethnicity and Level of Program*

Primary Responsibility

Data on the primary responsibility of faculty members were derived in the following manner. First, respondents reported the percentage of full-time appointment assigned to classroom teaching, field instruction, field liaison, administration, and other activities. Primary responsibility was then defined as whichever activity received the highest percentage. Individuals with equal responsibilities for classroom and field responsibilities fall into the "class and field" category. This method applies to all faculty members except those with formal administrative titles, such as dean or director. The primary responsibility for those faculty members with such titles was defined as their formal administrative title.

As shown in Table 16, over three-quarters (77.9 percent) of faculty members in graduate/joint programs and 74.3 percent of those in baccalaureate programs have teaching as their primary responsibility and most of them teach in the classroom. While some faculty members involved primarily in classroom teaching also have field responsibilities, very few have a primary responsibility that involves field teaching or liaison. Women were more likely than men to have primary teaching or administrative responsibilities involving field instruction. Men were also more likely to be employed as deans or program directors, particularly in graduate/joint programs.

*Does not include information for 171 faculty members with unreported data.

Table 17 also reports data on faculty responsibility. It displays the mean percentage of time assigned to each responsibility among full-time faculty members, not just the amount of time assigned to the primary responsibility. All categories of primary responsibility have relatively large mean percentages of time assigned to classroom teaching. In contrast, faculty members with nonadministrative primary responsibilities are assigned, on average, relatively little time to administration. The most common secondary assignment for the greatest proportion of faculty members is field liaison.

TABLE 17

Mean Percentage of Time Full-time Faculty Members Assigned to Responsibilities in Social Work Programs, by Primary Responsibility and Level of Program

Years on Full-time Faculty

Table 18 shows the number of years on full-time employment of faculty members (who are assigned at least 50 percent of their time to social work). A greater proportion of women than men have been hired recently. For example, the number hired for this year by graduate/joint programs included 72 men and 135 women and the number hired by baccalaureate programs included 26 men and 55 women. The disproportionate number of women appointed for this year is most pronounced at the lower ranks. The patterns of more women than men being recently hired and disproportionately so at lower levels of rank are patterns that have been noted in the CSWE annual surveys since the latter half of the 1970s. More males than females are consistently newly hired at the rank of full professor.

At the two highest ranks, men have held their positions longer than women have. The majority of male faculty have held their positions for eleven years or more. Conversely, at the two lowest ranks displayed on Table 18, women have held their positions longer.

At the graduate level the number of male and female faculty members is about the same. Baccalaureate female faculty outnumber male faculty.

TABLE 18

Years on Full-time Faculty, by Level of Program, Rank, and Gender

Level	Rank	Gender	Years on Full-time Faculty				
			0	1 - 5	6 - 10	11 and Over	Total

	Total	Male	26	78	55	173	332
		Female	55	178	78	143	454

Tenure

Tables 19 and 20 display the proportion of full-time faculty members with tenure. Table 19 shows that faculty with doctorates are more likely to be tenured than are faculty who only hold master's degrees. Table 20, however, shows that among assistant professors, faculty holding doctorates are slightly less likely to be tenured than are faculty holding master's degrees. Table 20 indicates that 59.9 percent of all tenured faculty are males. At the rank of professor, more men than women are likely to have tenure. This pattern is most pronounced at the graduate level. Except for the rank of full professor, at the baccalaureate level tenure is more evenly distributed between males and females.

TABLE 19

Percentage of Full-time Faculty With Tenure, by Highest Earned Degree and Level of Program*

Highest Earned Degree	Level of Program

Salary

Tables 21 through 23 report data on median salaries of full-time faculty members assigned at least 50 percent of the time to social work education. Table 21 represents the median salary and middle 50 percent (interquartile) range of full-time faculty members in the three principal academic ranks and for each of the ten regional classifications of the U.S. Department of Health and Human Services. In Table 21 all salary data are based on a nine-month academic year. If the salaries were reported for more or less than nine months, they were reduced or increased proportionately. The median salaries for each rank decrease from professor to assistant professor, as expected. Regions 1, 2, 3 and 4 have the highest median salaries for professors employed in graduate/joint programs. Five

* See Table 1 for a list of states in each region.

** Less than five cases reported.

1 The salary data are based on a nine-month academic year.

regions have median salaries above the group median for graduate associate professors, while three regions have median salaries for assistant professors at the graduate level above the group median. Among professors employed in baccalaureate programs the highest median salaries are reported in Region 3. The lowest median salaries at the baccalaureate level for the three reported ranks were reported in Regions 4, 6, and 8. The amount of unreported information on faculty data accounts for 18 percent of the total information. Caution is advised, therefore, in comparing across years. This is especially true this year at the baccalaureate level where incomplete reporting in several instances reduced the reportable faculty data below the minimum thought to insure confidentiality.

Table 22 presents salary statistics for full-time faculty members with different primary responsibilities. It presents two groups of medians and ranges for salary. In the first group, labeled "adjusted for months," all salaries were adjusted according to the nine-month academic year. The second group, labeled "unadjusted for months," represents whatever salary was reported, regardless of the number of months on which it was based. The data show that deans/directors and associate deans/directors of graduate/joint programs earn the highest salaries and that those faculty who have primary responsibilities related to the field earn the least. The widest salary range occurs in responsibility for classroom teaching, which also contains the greatest number of faculty.

TABLE 22

Salary Median and Range of Full-time Faculty, by Primary Responsibility and Level of Program

Level	Primary Responsibility	Salary				Number With Salary Reported
		Adjusted for Months		Unadjusted for Months		
		Median	Range	Median	Range	
Graduate and Joint	Class Teaching	40,739	22,978-91,296	42,762	22,978-93,600	1,088
	Class and Field	33,064	14,355-56,463	37,000	19,140-75,285	47
	Field Teaching/Liaison	31,461	19,556-61,299	35,772	19,556-61,299	93
	Dean/Director	53,959	31,500-102,810	71,622	35,800-137,081	82
	Assoc. Dean/ Director	47,963	30,967-71,305	59,816	34,018-95,074	55
	Assist. Dean/Director	38,079	23,400-57,401	45,000	31,200-76,535	34
	Dir./Undergraduate Pgm.	38,509	27,483-67,116	43,128	27,483-78,958	36
	Dir./Field Instr.	32,696	21,931-54,993	41,921	25,300-67,214	62
	Assist. Dir/Field Instr.	34,372	21,000-46,242	37,126	25,750-48,407	17
	Director/Admissions/ Minority Recruit.	35,213	19,220-64,000	41,000	25,627-64,000	25
	Director/Continuing Ed./ Work Study	38,157	23,814-53,963	46,208	26,460-69,474	16
	Other Administration	0	0	0	0	0
Baccalaureate	Class Teaching	31,000	11,016-65,000	32,650	12,240-67,592	356
	Class and Field	29,000	12,105-42,088	29,581	16,140-53,187	27
	Field Teaching/Liaison	30,000	14,380-48,588	30,367	16,400-48,588	29
	Dean/Director	34,215	16,437-61,658	36,000	18,264-67,639	192

At the baccalaureate level there is little median salary variation. Baccalaureate deans/directors earn the highest salaries, and faculty show the widest salary range where the category of primary responsibility is the classroom.

Salary in Relation to Gender and Ethnicity

Table 23 compares the median salaries of men and women and of white and ethnic minority faculty members of the same rank, degree, and level of program. Because of disparity between the sexes in higher and lower-paying job responsibilities, only those instructors whose primary assignment is classroom teaching were included in the analysis. Within graduate/joint programs, white female professors without doctorates have the highest median income, while all others lag behind. Ethnic professors with doctorate degrees earn far less than white professors do. Other comparisons at the graduate/joint level vary with no prominent pattern. Baccalaureate faculty members at comparable ranks earn less than do faculty employed in graduate/joint programs. Faculty with master's degrees tend to earn less than do faculty with doctorates, but this pattern is not as pronounced at the baccalaureate level of employment.

TABLE 23

Median Salary of Full-time Classroom Faculty,
by Rank, Ethnicity, Highest Earned Degree, Gender, and Level of Program

Level	Rank	Ethnicity	Degree and Gender			
			Doctorate		Master's	
			Male	Female	Male	Female
Graduate and Joint	Professor	White	$55,581	$54,468	$49,232	$59,902*
		Ethnic	51,800	49,786	54,174*	**
	Associate Professor	White	43,750	42,527	45,731	40,091
		Ethnic	43,760	38,018	43,045	40,450
	Assistant Professor	White	34,486	33,900	33,000	33,000
		Ethnic	34,521	34,546	30,088	32,149
Bacca-laureate	Professor	White	45,000	**	36,270*	36,000*
		Ethnic	50,000*	40,500*	**	**
	Associate Professor	White	37,692	34,571	36,050	36,756
		Ethnic	35,822	35,623*	**	37,277*
	Assistant Professor	White	30,000	29,800	27,817	27,564
		Ethnic	32,125*	30,900*	31,185*	27,625

* Median based on less than ten cases.

** Categories of rank or ethnicity omitted where the data available are based on less than five cases.

Percentage of Salary from Internal University Sources Versus External Sources

Table 24 shows that most of the funds for faculty salaries continue to come from internal university sources. Only five groups receive more than 5 percent of their salaries from external funds, and they are all located at the graduate/joint level. They include all full-time faculty members except those whose primary responsibility is in the in classroom. The other groups are those whose primary responsibility is in the "Other" category or in "Class and Field." The "Other" category had substantial increases in external funding over past years, and that pattern continued this year. At the graduate/joint level both full and part-time faculty with "Other" responsibilities receive less than 70 percent funding from internal university sources.

TABLE 24

Percentage of Salary from Internal University Sources,
by Level of Program, Primary Responsibility, and Type of Appointment

Level	Primary Responsibility	Type of Appointment		Total
		Full-time	Part-time	
Graduate and Joint	Class Teaching	98.7	97.9	
	Class and Field	92.8	89.4	
	Field Teaching or Liaison	91.9	96.2	
	Other	67.1	63.3	96.0
Bacca-laureate	Class Teaching	99.3	95.9	
	Class and Field	96.8	100.0	
	Field Teaching or Liaison	97.1	100.0	
	Other	100.0	100.0	97.7

Number of Publications

Respondents were instructed to report the number of publications that actually appeared in print for each faculty member during the most recent 12 month period conforming to their record-keeping system. They reported on five categories of publications: (1) articles in refereed journals; (2) books published by formal publishing companies; (3) chapters in books published by formal publishing companies; (4) external reports or monographs; and (5) book reviews. To adjust for multiple authorship, respondents were instructed to report fractions, such as .5 for publications with one co-author, .33 for publications with two coauthors, and so on. It was difficult to know if respondents actually followed these instructions, especially if an individual faculty member published more than one item in any given category. The results in this section should be considered with great care.

On average, faculty members published .38 articles, .26 books, .16 book chapters, .24 monographs, and .16 book reviews. These averages are misleading, however, as relatively few faculty reported publishing at all. Among the group of faculty members publishing at least one item (n=1740), the averages are 1.4 articles, .29 books, .68 book chapters,1.5 monographs, and 1.3 reviews. More faculty reportedly published more books and reviews and the same amounts in other categories in this academic year than in last year. Those faculty who publish one article remain prolific, compared to all faculty. With the exception of those writing monographs and reviews, the baccalaureate faculty, on average tend to publish less than their graduate/joint counterparts do. At each program level those women who published at all outpublished their male counterparts in the number of books and reviews.

BACCALAUREATE STUDENTS

Baccalaureate student data were submitted by 311 (84.9 percent) of the 366 baccalaureate programs accredited at the time of this survey. Table 25 displays the distribution of the data from respondent programs by the size of their junior and senior enrollments. Institutions vary regarding the time of declared majors; therefore, only the junior and senior years are examined when comparing enrollment sizes. Fifty percent of the baccalaureate programs have less than 50 students in the junior and senior years, 75 percent have less than 75 students, and the modal category is 25-49. The median junior/senior year enrollment size is 46. Until 1984 there was a trend toward declining median junior/senior enrollment size - a trend that had been linked to the introduction of new baccalaureate programs, but that now is reversing. This is the second year that the median junior/senior enrollment size increased.

TABLE 25

Accredited Baccalaureate Programs, by Size of Full-time Junior and Senior Year Enrollment

Junior and Senior Enrollment	#	%
Under 25	74	23.9
25 - 49	86	27.8
50 - 74	67	21.7
75 - 99	30	9.7
100 - 149	39	12.6
150 and over	13	4.2
Total	309*	100.0

* Two programs did not provide data on this item.

The total reported enrollment of full-time degree students (including those in their freshman and sophomore years) is 28,370. Of these, 18,264 are in their junior/senior year, and 10,106 are in their freshman or sophomore year. An additional 4,945 part-time degree students were reported, as well as 17,223 other students not working toward a degree in social work but taking social work courses.

Enrollments in baccalaureate programs declined in the past. In 1983 the rate of decline decreased when compared to previous years. From 1984 through 1988 there was an increase in every one of the above categories of enrollment. In 1989 there were decreases in the total number of full-time degree students, the number of full-time juniors and seniors, and in the number of full-time freshmen and sophomores. Last year there were increases in the number of part-time degree students and in the number of other (non-degree) students taking social work courses. This year, 1990, there was an increase of 7.7 percent in the total number of full-time students, 10.5 percent in the number of full-time juniors and seniors, 3.8 percent in the number of part-time degree students, and in the number of other (nondegree) students taking social work courses. The number of freshmen and sophomores decreased slightly (0.3 percent).

Table 26 displays the distribution by gender of the full-time junior and senior enrollment and of students awarded degrees. The proportion of women among juniors and seniors enrolled (84.2 percent) remained constant. Their proportion among those awarded degrees increased 2.4 percent from last year.

TABLE 26

Juniors and Seniors Enrolled Full-time in Baccalaureate Programs, 11/1/90, and Students Awarded Baccalaureate Degrees, 1989-90, by Gender*

Gender	Juniors and Seniors Enrolled		Students Awarded Degrees	
	#	%	#	%
Female	15,047	84.2	6,353	87.6
Male	2,641	14.8	890	12.3
Total	17,688	100.0	7,250	100.0

*Totals may not correspond between tables or between columns because of variation in item response rates.

Table 27 displays the ethnic distribution of full-time junior and senior enrollments and of students awarded degrees. Between Academic Years 1989 and 1990, the proportion of full-time enrolled ethnic minority students increased slightly (0.5 percent). The proportion of degrees awarded to ethnic minority students increased to 22.4 percent in 1989 and 24.1 percent in 1990.

The largest group of ethnic minority students is Black, comprising 15.4 percent of juniors and seniors and 15.2 percent of degrees awarded. Chicano and Puerto Ricans have the second largest proportion of enrollment. Ethnic and white student and graduate proportions fluctuated slightly this year, as in past years. These fluctuations appear driven by the varying response rates of the programs in reporting data on ethnicity.

TABLE 27

Juniors and Seniors Enrolled Full-time in Baccalaureate Programs, 11/1/90, and Students Awarded Baccalaureate Degrees, 1989-1990, by Ethnicity

Ethnicity	Juniors and Seniors Enrolled		Students Awarded Degrees	
	#	%	#	%
Asian American	253	1.4	95	1.3
Black	2,756	15.4	1,099	15.2
Chicano	549	3.1	155	2.1
Native American	184	1.0	80	1.1
Puerto Rican	414	2.3	293	4.0
Other	146	0.9	64	0.8
White	13,472	75.4	5,616	77.5
All Ethnic Minorities	4,246	23.8	1,745	24.1
Foreign	115	0.6	30	0.4
Total	17,868	100.0	7,250	100.0

* The totals may not correspond between tables or between columns because of variation in item response rates.

GRADUATE STUDENTS

Enrollment

The number of full-time enrollments in master's programs increased every year between 1955 and 1978. Enrollment then fell each year between 1979 and 1983, leveling off in 1984 and 1985. This year the enrollments increased again. Since 1985 not all programs have responded to this portion of the annual survey. From 1981 through 1987 as the number of students enrolled full-time declined, the number of students enrolled part-time increased. The number of enrolled part-time master's students, however, has steadily increased since 1976. The number of part-time students enrolled in master's programs in 1990 was 9,945 as compared to 9,420 in 1989, a 5.6 percent increase. Part-time students make up 36.3 percent of the total master's enrollment, and in 16 programs part-time students now outnumber full-time students. In 47 graduate programs, part-time students comprise 40 percent or more of students.

Trends in the enrollment levels of doctoral programs resemble those of master's programs. Full-time enrollment also decreased, from 857 in academic year 1989 to 838 this year. Part-time enrollment decreased, with enrollment dropping from 989 in academic year 1990 to 956 in 1990, a 3.3 percent decrease. The reported proportion of full-time doctoral enrollment was less than that of part-time, 46.7 versus 53.3 percent.

TABLE 28

Students Enrolled in Master's and Doctoral Programs 1965 - 1990**

Year	Master's Programs	Doctoral Programs	Year	Master's Programs		Doctoral Programs	
	Full-time	Full-time		Full-time	Part-time	Full-time	Part-time
1965	8,136	194	1978	17,672	4,333	821	640
1966	9,335	232	1979	17,397	4,942	954	535
1967	10,178	258	1980	17,122	5,274	825	710
1968	10,847	307	1981	16,552	5,761	868	794
1969	11,711	450	1982	15,131	6,174	922	798
1970	12,821	443	1983	14,265	7,225	855	954
1971	13,386	502	1984	14,275	7,294	798*	1,027*

1977	17,533	866	1990	17,475*	9,945*	838*	956*

* Response rate less than 100 percent.

** 96 of 99 master's programs and 45 of 48 doctoral programs responded to this portion of the survey.

Applications and Admissions to Master's Degree Programs

Table 29 displays data on applications and admissions for 1989 and 1990. These data show an 11.2 percent increase in all applications to master's programs. Full-time applications increased 13.1 percent and part-time applications increased 7.1 percent in 1990. The percentage of applications considered increased (3.6 percent) this year for full-time. Part-time program application acceptance also increased slightly, 0.2 percent. The percentage of applications accepted in part-time programs (63.7 percent) is higher than in full-time programs (61.9 percent). The percentage of accepted applicants in part-time programs who eventually register is 13.9 points higher than in full-time programs, a 0.4 percent decrease.

TABLE 29

Applications for Admission to First-year Master's Degree Programs in 1989 and 1990, by Action Taken*

Year	Program	Action							
		Total Received		Considered for Admission		Accepted		Registered	
		#	%	#	%	#	%	#	%
1990	Full-time Programs	19,427	100.0	17,206	88.6	12,025	61.9	7,414	38.2
	Part-time Programs	8,561	100.0	7,516	87.8	5,452	63.7	4,458	52.1
	Total	27,988	100.0	24,722	88.3	17,477	62.4	11,872	42.4
1989	Full-time Programs	17,174	100.0	14,595	85.0	10,214	59.5	6,415	37.4
	Part-time Programs	7,994	100.0	7,004	87.6	5,219	65.3	4,129	51.7
	Total	25,168	100.0	21,599	85.8	15,433	61.3	10,544	41.9

*96 of 99 programs reported data.

Table 30 displays Academic Year 1990 data regarding applications for advanced standing. The majority of applications come from graduates of baccalaureate programs in social work (BSW), 72.2 percent of which are from other schools not under the auspices of the schools receiving the applications. Applications from the BSW graduates from the same school as the master's program have higher rates of acceptance and enrollment (72.7 and 59 percent, respectively) than do those from other schools (70.8 and 45 percent, respectively). Overall 53 percent (46.5) of the students who apply for advanced standing actually enroll.

TABLE 30

Applications for Advanced Standing Status in Master's Degree Programs in 1990, by Source/Basis and Action*

Action	Source or Basis							
	Baccalaureate Social Work Programs				Other Education		Total	
	Own School		Other School					
	#	%	#	%	#	%	#	%
Received	894	100.0	2,327	100.0	581	100.0	3,802	100.0
Accepted	650	72.7	1,648	70.8	266	45.8	2,564	67.4
Enrolled	527	59.0	1,048	45.0	193	33.2	1,768	46.5

*96 of 99 programs reported data.

Degrees Awarded

While enrollments at the master's level dropped in recent years, so did the number of master's degrees awarded, as shown in Table 31. From 1980 to 1984 the number of degrees awarded declined. In 1986 they began to increase and have continued to do so until last year. The declining trend in degrees awarded may be a result of lower response rates the last two years. The number of master's degrees awarded (10,063) this year is higher than last year's number (9,509), a 5.8 percent increase. The degrees awarded by doctoral programs increased between 1989 and 1990, from 189 to 247. The response rate to this portion of the survey was 100 percent two years ago and lower the past two years, accounting for much of the decrease.

TABLE 31

Graduate Students Receiving Master's and Doctoral Degrees, Academic Year 1964-65 Through 1989-90**

Academic Year	Master's Degree	Doctoral Degree	Academic Year	Master's Degree	Doctoral Degree
1964-65	3,206	39	1977-78	9,476	178
1965-66	3,693	56	1978-79	10,080*	174*

* Response rate less than 100 percent.

** 96 of 99 master's and 45 of 48 doctoral programs responded to this part of the survey.

Characteristics of Graduate Students

Table 32 displays the distribution of enrollments and degrees awarded by gender. In recent years the percentage of women enrolled and receiving degrees at the master's and doctoral levels has increased. Since 1985 that trend seems to have stabilized. Women make up 82.3 percent of full-time and of part-time master's students, as well as receive 82 percent of master's degrees awarded. In contrast, women make up 64.9 percent of full-time enrollment in doctoral programs and receive 67.2 percent of doctoral degrees awarded. The latter figures represent a decrease of 1.6 percent in female doctoral students and a 2.2 percent increase in doctoral graduates who are female.

The age distribution of male and female graduate students is displayed in Table 33. Among full-time master's students the modal age category for women is under 26. For men it is 31 to 40. For part-time master's students the modal category for each gender is 31 to 40. The modal age category for men in doctoral programs is 31 to 40. This applies to part-time as well as full-time enrollments. For women, the mode is 31-40 for full-time and over 40 part-time enrollments.

TABLE 32

Percentage of Full and Part-time Master's and Full-time Doctoral Students, Enrolled 11/1/90, and Students Awarded Degrees 1989-90, by Gender*

Gender	Master's Students				Doctoral Students	
	Enrolled			Awarded Master's Degrees	Enrolled Full-time	Awarded Doctoral Degrees
	Full-time	Part-time	Total			
Male	17.7	17.7	18.0	17.4	35.1	32.8
Female	82.3	82.3	82.0	82.6	64.9	67.2

*96 of 99 master's and 45 of 48 doctoral programs responded. The totals may not correspond between tables because of variation in response rate.

Table 34 displays the ethnicity of graduate students enrolled and of those awarded degrees. Ethnic minorities made up 16.9 percent of full-time and 20.6 percent of part-time master's program enrollment, and received 15.9 percent of master's degrees awarded. Additionally, ethnic minorities made up 25 percent of full-time and 20.5 percent of part-time doctoral student enrollment, and received 25.5 percent of doctoral degrees awarded. Blacks are the ethnic minority group with the highest percentage of enrollment and degrees awarded at both graduate levels.

Type of Concentration

Tables 35 and 36 display the distribution of all master's students by their primary classroom concentration. In Table 35 the distribution of students by concentration in methods categories is shown. It shows how many students are concentrating in each method either by itself or in combination with a field of practice or social problem category. Table 36 reports the primary field of practice or social problem concentration distributed across the field of practice or social problem category. These two tables report the same information, but table 36 has a different organizational focus than Table 35. Both tables include all master's students, first and second year, full-time as well as part-time.

Table 35 indicates that 97.7 percent of all master's students have or will have a methods concentration and that 63.2 percent of those with a methods concentration take it in combination with a field of practice or social problem concentration. The most prominent methods concentration is direct practice, which accounts for 52.3 percent of all students, 56.8 percent of those with a methods concentration, and 55.5 percent of those with a direct practice concentration combined with another method. The generic category is next in prominence, accounting for 12.5 percent of all students. Only 2.3 percent of all students concentrate in a field of practice or social problem alone.

Table 36 shows that mental health is the most prominent field of practice or social problem concentration in the classroom, and this concentration accounts for 10.6 percent of master's students. Family services, health, and child welfare follow with 7.8, 7.6, and 5.5 percent, respectively, of master's students in these fields of practice. Over 4,690 students had not determined their primary field of practice and 8,591 are in methods concentrations only. More students had not determined their primary field of practice, and 2.2 percent more students are in methods concentrations only. These increases reflect a shift toward a concentration in only methods. Although all master's programs provided data on students, not all programs completed this portion of the survey. Caution in interpreting the data is advised.

TABLE 35

Master's Degree Students Enrolled 11/1/90, by Primary Methods Concentration*

Field of Practice in Field Instruction

Information on field of practice in field instruction is displayed in Table 37. Sixteen percent (16.3) of master's students were assigned to field instruction in mental health. An additional 9.8 percent were assigned to field instruction in health, 9.0 percent to family services, and 5.9 percent to child welfare. The foregoing four fields account for only 42 percent of all placements, unlike last year then they accounted for 63.7 percent. More than 11,460 students either had no primary field of practice in their field instruction or had not yet been assigned.

Financial Aid

Table 38 reports the proportion of students in each ethnic group receiving financial aid. Percentages were calculated according to the number of students enrolled full-time within each given ethnic group. For full-time master's students 52.5 percent are receiving grants as compared to 78.5 percent of full-time doctoral students. The data also indicate that ethnic minority students are more likely to receive financial aid than are white students, although this pattern is less pronounced at the doctoral level. Blacks are the most likely to receive grants among master's students, while Chicanos and Asian Americans are the most likely to receive doctoral financial aid. Among ethnic minorities Native Americans have the lowest pertcentage of aid recepients in master's programs, as do Puerto Ricans in doctoral programs.

TABLE 38

Full-time Master's and Doctoral Students Receiving Financial Grants 11/1/90, by Ethnicity

Total	9,210	52.5	671	78.5

Table 39 displays the number of financial grants awarded in 1990 and the sources of the grants. Twelve percent (12.5) of all grants awarded to master's students are paid directly by field instruction agencies. Funds paid by these agencies come from a wide variety of sources. The two most common federal sources are the FCWSP and the Veterans Administration. Other prominent sources of grants paid directly from field instruction agencies include voluntary social welfare agencies and state or local governments. The most common federal source of funds not tied to field instruction is FCWSP, which accounts for 4.3 percent of all grants awarded to master's students. Prominent non-federal sources are formal loan programs, accounting for 35.4 percent of all grants, and the school or university, accounting for 25.9 percent of all grants not tied to field instruction. For doctoral students, the most common source of grants are the school or university (43.6 percent), research or graduate assistantships (32.1 percent), and formal loan programs (6.0 percent). The most prominent federal source of funds for doctoral students is "Other".

Student-Faculty Ratios

Data on student-faculty ratios are displayed in Table 40. In calculating the total number of students per program for these ratios part-time students were counted as one-half, and each faculty member was counted according to the precise full-time equivalent percentage of time he or she is assigned to the doctoral or master's level as reported by respondents. For example, a full-time faculty member teaching 50 percent at each level would be counted as 50 percent at each level. Likewise, half-time faculty members dividing their time equally between the two levels would be counted as 25 percent at each level, and so on. The median student-faculty ratio in master's programs is 12.2. Doctoral programs tend to have lower student-faculty ratios. Their median is 9.8.

TABLE 40

Student-Faculty Ratios in Master's and Doctoral Programs, 11/1/90

Student-faculty Ratio	Master's Programs		Doctoral Programs	
	#	%	#	%
Less Than 6	0	0.0	3	8.6
6 - 8	2	2.7	12	34.3
9 - 11	26	36.2	6	17.1
12 - 14	25	34.8	3	8.6
15 and over	19	26.3	11	31.4
Total	72	100.0	35	100.0
Median	12.2		9.8	

CANDIDATE SCHOOLS

There are 39 programs currently in candidacy; 14 master's programs and 25 baccalaureate programs. Additionally, nine of the master's programs in candidacy are administered jointly with fully accredited baccalaureate programs. Only one baccalaureate program in candidacy is administered jointly with a fully accredited master's program. The master's programs in candidacy graduated 195 students and the baccalaureate programs graduated a total of 452 students. The overall distribution of ethnic minority graduates of master's programs in candidacy (14.9) is lower than that of fully accredited master's programs (15.9). The proportion of ethnic minority baccalaureate graduates of programs in candidacy (34.4) was higher than that of graduates of fully accredited baccalaureate programs (24.1). This is especially pronounced for Native Americans. Gender distributions are the same as those of fully accredited programs. Table 41 displays the data on graduates of schools in candidacy.

TABLE 41

RECENT TRENDS IN SOCIAL WORK EDUCATION

This section highlights selected five-year trends, as displayed in Tables 42 and 43. Table 42 displays the trend data for baccalaureate programs. As noted in the footnote accompanying this table, it is unclear to what extent variation in response rates drives what appear to be trends over time. The most consistent trends apear to be a gradual decline of ethnic minority faculty members, an increase in the percent of faculty members with doctorates, and the increasing number of students not working toward a degree in social work who are taking social work courses. The number of degrees awarded increased slightly this year. Full-time enrollments this year were considerably higher than last, and appear to represent an overall upward trend. The percentage of women enrolled did not decline this year, nor did the percentage for ethnic minority enrollment. There were increases in each category, but only the percentage of women enrolled has remained stable over time.

*These trends should be interpreted cautiously because response rates vary from year to year.

Table 43 displays the trend data for graduate programs. Caution should be used in comparing the 1989 figures on students to those of earlier years due to the varying response rates of recent years. In prior years no more than one graduate program failed to respond to the annual survey. Since 1985 the number has exceeded three and this year five programs failed to return student schedules, while seven more returned some, but not all, schedules. Despite the large non-response rates in past years, it appears that the steep declines in enrollments in and applications to master's programs that occurred in the late 1970s and early 1980s have leveled off. This year enrollment decreased at the master's level by less than one percent and by three and one half percent at the doctoral level. Other trends include the slow increase in the proportion of faculty holding doctorates, and an increase over time in the proportion of women faculty members at all ranks. The rise in recent years in the number of part-time master's and doctoral students continued this year, with both program levels showing increases in part-time students. Another trend is the increase over time in the proportion of women in full-time doctoral study, although this year showed a decrease. The percentage of women in doctoral studies is now 68.5 percent, 12.6 percentage points lower than that of women in full-time master's programs. While median salaries appear to have risen over time, these figures are unadjusted for inflation.

San Diego State University
School of Social Work

San Francisco State University
Department of Social Work Education

San Jose State University
School of Social Work

University of California, Berkeley
School of Social Welfare

University of California, Los Angeles
School of Social Welfare

University of Southern California
School of Social Work

Colorado

Colorado State University
Department of Social Work

University of Denver
Graduate School of Social Work

Connecticut

Southern Connecticut State University
School of Social Work

University of Connecticut
School of Social Work

Delaware

Delaware State College
Department of Social Work

The District of Columbia

Catholic University of America
National Catholic School of Social Service

Howard University
School of Social Work

Florida

Barry University
School of Social Work

Florida International University
School of Public Affairs & Services

Florida State University
School of Social Work

University of South Florida
Department of Social Work

Georgia

Clark Atlanta University
School of Social Work

University of Georgia
School of Social Work

Hawaii

University of Hawaii
School of Social Work

Illinois
Aurora University
School of Social Work

Loyola University of Chicago
School of Social Work

University of Chicago
School of Social Service Administration

University of Illinois, Chicago
Jane Addams College of Social Work

University of Illinois, Urbana/Champaign
School of Social Work

Indiana

Indiana University
School of Social Work

Iowa

University of Iowa
School of Social Work

Kansas

University of Kansas
School of Social Welfare

Kentucky

Southern Baptist Theological Seminary
Carver School of Church Social Work

University of Kentucky
College of Social Work

University of Louisville
Kent School of Social Work
